---------------	---

Introduction

Vantage DX Monitoring is a monitoring tool that provides the information you need in order to understand service delivery issues on Microsoft applications and resources. It provides you with proactive alerts so that you can work directly on issues before they become a problem for your business.

Document Purpose and Intended Audience

This document summarizes the content introduced by Vantage DX Monitoring Release 2.3. This document is intended for use by trained partners and end users.

Revision History

Document Date	Description
November 17, 2021	Vantage DX Monitoring Release 2.3

Vantage DX Monitoring 2.3

The following sections provide a summary of the changes introduced in Vantage DX Monitoring Release 2.3.

- ["New in this Release" on page 5](#)
- ["Fixed Issues" on page 6](#)

New in this Release

Vantage DX Monitoring Release 2.3 includes the following new features and enhancements:

- ["Vantage DX Solution" on page 5](#)
- ["Support Removed for Skype for Business Workload" on page 6](#)
- ["Monitoring Office 365 Health in GCC High Environments" on page 6](#)

Vantage DX Solution

Gizmo has been renamed Vantage DX Monitoring and is now available as part of the Martello Vantage DX solution. Vantage DX Monitoring integrates with Vantage DX Analytics and Vantage DX Diagnostics in an end-to-end cloud-based solution that allows you to:

- Quickly detect performance issues.
- Locate the source of performance issues to determine the best path to resolution.
- Anticipate and correct potential performance issues before they impact your users.
- Report on and share service level agreement statistics.

The Vantage DX solution has a portal that provides single sign-on capabilities for all of the Vantage DX modules. If you are using Vantage DX Monitoring as part of the Vantage DX solution, you must configure user authentication in the Vantage DX portal. For more information, see the *Vantage DX Deployment Guide*. It is available on the Martello website at:

<https://martellotech.com/documentation/vantage-dx/>

If you are using Vantage DX Monitoring in a standalone deployment, use Windows authentication to manage user access. For more information, see the *Vantage DX Monitoring Cloud Deployment Guide* or the *Vantage DX Monitoring Installation Guide – On-Premises Deployments*. The guides are available on the Martello website at:

<https://martellotech.com/documentation/monitoring/>

Support Removed for Skype for Business Workload

Microsoft has discontinued Skype for Business, and as a result, the workload is no longer available in Vantage DX Monitoring. Any existing monitoring configurations will be removed during the upgrade to this release.

Monitoring Office 365 Health in GCC High Environments

This release includes the ability for customers in GCC High environments to monitor the Office 365 Health workload.

Fixed Issues

The following issues were fixed in the 2.3 release of Vantage DX Monitoring.

Issue Type	Issue	Affected Version
Application	Exchange MAPI configuration is not able to monitor an on-premises Exchange server. The following error displays: System.Net.WebException: The remote name could not be resolved: 'login.microsoftonline.com'	2.2
Application	A Chromium error causes the monitoring of SharePoint pages to time out.	2.2
Application	In GCC High environments, robots are unable to perform upload and download actions in Teams.	2.2
