

# Quick Start Guide

## Onboarding New Clients—For Service Providers

This guide provides an overview of the tasks that you need to complete when you onboard a new client. It explains how to establish a unique identifier for each new client and apply it consistently across configurations, which is essential to successfully search and manage your client's data.

### Before you Begin

Assign a unique identifier to each client. You will use this identifier for:

- The Robot Manager alias
- The Vantage DX Diagnostics Site Group name
- The Microsoft Teams CQD integration name
- The Vantage DX Diagnostics integration name
- The Microsoft 365 integration name

In this document, the unique identifier is referred to as <clientname>.

For more information about how to establish a naming convention, see [Naming Conventions](#).

## Onboarding Process

Step	Module	Description	More Information ...
1	Vantage DX Monitoring	Deploy one or more Robot Managers. In the Vantage DX Monitoring interface, enter the following information in the <b>Alias</b> field:  <clientname> - <city> - <machinename>	<a href="#">Edit Monitoring Credentials</a>

## Onboarding New Clients—For Service Providers

Step	Module	Description	More Information ...
2	Vantage DX Diagnostics	<p>Configure a site group for the new customer and enter the &lt;clientname&gt; in the <b>Name</b> field.</p> <div>  <p><b>Note:</b> You must configure a site group in Vantage DX Diagnostics for each customer.</p> </div>	<a href="#">Configure a Site Group</a>
3	VDX Analytics	<p>Add the following integrations and specify the &lt;clientname&gt; as the integration name:</p> <ul style="list-style-type: none"> <li>• Microsoft Teams CQD</li> <li>• Vantage DX Diagnostics</li> <li>• Microsoft 365</li> </ul> <div>  <p><b>Note:</b> You must add an integration for each customer.</p> </div>	<a href="#">Add an Integration</a>
4	VDX Analytics	Create any boards or business services required for the client.	<a href="#">Create a Board</a> and <a href="#">Create a Business Service</a>
5	Martello Delivery Engineer	Request a new client from Martello. Martello will create a new claim and group in Identity Access Management (IAM).	—

## Onboarding New Clients—For Service Providers

Step	Module	Description	More Information ...
6	VDX Analytics	Create a role for the client and enter the <clientname> in the <b>Claim Value</b> field.	<a href="#">Create a Role</a>
7	VDX Analytics	Configure the client's access to boards, business services, and dashboards.	<a href="#">Add Boards or Business Services to a Role</a> and <a href="#">Add Dashboards to a Role</a>

## Searching for Client Data

You will use the unique identifier that you assigned to a client when you search for data in VDX Analytics. For this reason, it is important that you use the identifier consistently.

You can use the search function to find components, alerts, and incidents related to boards and business services. This section provides some examples of searches that Martello has deployed with several partners for their clients. For more information about searches and search operators, see [Perform a Search](#).

Description	Search String
<b>Microsoft 365 Service Health</b>	
Service Health for all workloads	source.Office365.Service:* AND sourceName:CLIENTNAME
Service Health for a specific workload	source.Office365.Service:Exchange AND sourceName:CLIENTNAME
<b>Vantage DX Monitoring</b>	
All Robot results	source.Gizmo.appAlias:* AND CLIENTNAME
Robot health	source.Gizmo.alias:CLIENTNAME

# Onboarding New Clients—For Service Providers

Description	Search String
Robot Results for one workload (Exchange)	source.Gizmo.appAlias:Exchange AND NOT (source.Gizmo.appAlias:Network) AND CLIENTNAME
<b>Vantage DX Diagnostics</b>	
All Probes results	source.NPV.service:* AND sourceName:CLIENTNAME
Probes result for Teams only (if other endpoints are monitored)	source.NPV.type:MicrosoftTeamsInstance AND sourceName:CLIENTNAME
Probe health	source.NPV.nodeType:Probe AND sourceName:CLIENTNAME
<b>Microsoft Teams CQD</b>	
Dynamic Offices	source.Office365CQD.groupType:OfficeGroup AND source.Office365CQD.NumberOfDevices:>3 AND sourceName:CLIENTNAME
Large meetings	source.Office365CQD.groupType:Meeting AND source.Office365CQD.Number\ Of\ Attendees:>=10 AND sourceName:CLIENTNAME
By country	source.Office365CQD.groupType:Country AND sourceName:CLIENTNAME
